

Daniel Peregrino Perez

Full Stack Developer with Artificial Intelligence

Tuxtla Gutiérrez, Mexico 966 122 9859 danielperegrinoperez@gmail.com www.redfoxsolutions.lat LinkedIn GitHub

PROFILE

Full Stack Developer passionate about Artificial Intelligence, with experience in software product development: from gathering requirements and designing MVPs to scaling solutions in production. Technical expertise in AI agents, MCP, LangChain, LangGraph, and RAG, along with modern architectures and best practices in documentation and version control. Effective communication, adaptability, and continuous learning. Value proposition: I quickly understand business needs and translate them into viable technical solutions, delivering quality results from the first sprint.

EDUCATION

08/2022 – 04/2026 **Software Engineering** — Specialization in AI and Backend, Universidad Politécnica de Chiapas • Chiapas

WORK EXPERIENCE

Software & AI Engineer — Computer Vision Lead Developer, APrendIA Project, Professional Internship 01/2026 – 04/2026
Tuxtla Gutiérrez

- Designed asynchronous backend architecture with FastAPI for an educational assessment platform with a desktop client.
- Built an Edge Computing pipeline with Python and OpenCV to extract and normalize handwritten characters in noisy environments.
- Implemented detection with YOLOv1, morphological filters (CLAHE, adaptive thresholding), and a scoring engine based on distance and skeletonization.

Full Stack AI Engineer & Code Reviewer / AI Training Specialist, Outlier AI 02/2025 – 01/2026

- Audited and optimized AI-generated Full Stack solutions, identifying logical flaws and security vulnerabilities.
- Developed Golden Trajectories (Ground Truth), documenting reasoning and tool usage for AI agents.
- Implemented atomic evaluation rubrics and audited Python/SQL code, improving solution accuracy and quality.

Full Stack Software Engineer & Data Analyst, Freelance / Independent Projects 01/2025 – 12/2025

- Microservices with hexagonal architecture in Python and Node.js, using Supabase and Firebase as BaaS.
- Built interfaces with Next.js, React, and TypeScript applying Atomic Design, reducing development cycles.
- Deployed systems on AWS and Railway with Docker and CI/CD, ensuring high availability.
- Designed and managed relational databases PostgreSQL and MySQL: complex schemas, query optimization, and data integrity.
- Developed executive reports and interactive dashboards with Power BI and EDA; automated reports and real-time indicators.

SKILLS

Frontend

React · Next.js · Vite · Flutter · Kivy · HTML5 · CSS3 · Atomic Design · Figma

Backend & Architecture

Python · FastAPI · Django · JavaScript · TypeScript · Node.js · NestJS · Express · Microservices · Hexagonal Architecture · SOLID · BaaS · Supabase · Firebase · REST APIs · WebSockets

AI & Data

LangChain · LangGraph · RAG · LLMs · AI Agents · YOLO · OpenCV · ONNX · Vector Databases · Prompt Engineering · RLHF · Ground Truth · PostgreSQL · MySQL · MongoDB · Redis · SQL Server · EDA · ETL · Power BI · Dashboards & KPIs

Cloud & DevOps

AWS Certified · Docker · CI/CD · Railway · Git · GitHub · Linux

Soft Skills

Analytical Thinking · Problem Solving · Effective Communication · Remote Teamwork · Adaptability · Attention to Detail · Time Management · Technical Leadership · Proactivity · Continuous Learning

CERTIFICATIONS

AWS Academy Graduate: Cloud Foundations / Operations / Security
Cisco Certified: Cybersecurity, IoT and Network Support
Kaggle: Computer Vision Models

LANGUAGES

Spanish — Native
English — C1 Level
