Summary

Full Stack Software Engineer focused on system architecture and AI automation. I build scalable backend systems in Python and Node.js (microservices, hexagonal architecture, SOLID) and frontends in React/Next.js with TypeScript. I design autonomous AI agents (LangChain, RAG) to automate business processes, with end-to-end experience from design to cloud deployment (AWS, Docker, CI/CD).

Experience

- APrendIA Project**, Software & AI Engineer

 - Designed the asynchronous backend architecture (FastAPI) of an educational assessment platform with a desktop client.
 - Built a computer vision pipeline (YOLO + ONNX + OpenCV) for automated image processing and normalization.

Chiapas, Mexico
Ene 2026 – Abr 2026
4 meses
- Outlier AI**, Full Stack AI Engineer & Code Reviewer

 - Developed autonomous agents with LangChain and LangGraph integrating vector databases (RAG).
 - Audited and optimized AI-generated Full Stack solutions, detecting logic flaws and security vulnerabilities.

Remote
Feb 2025 – Ene 2026
1 año
- Freelance / Independent Projects**, Full Stack Software Engineer

 - Designed scalable microservices with hexagonal architecture in Python and Node.js, integrating Supabase and Firebase (auth, real-time DB, storage).
 - Built interfaces with Next.js, React and TypeScript using Atomic Design, shortening development cycles.
 - Deployed systems on AWS and Railway with Docker and CI/CD, ensuring high availability.

Education

BSc Universidad Politecnica de Chiapas, Software Engineering Ago 2022 – Abr 2026

Skills

- Backend & Architecture:** Python (FastAPI, Django), Node.js (Nest.js, Express), Microservices, Hexagonal Architecture, SOLID, REST APIs.
- Frontend:** React, Next.js, TypeScript, JavaScript, Vite, Flutter.
- AI & Automation:** LangChain, LangGraph, RAG, LLMs, Vector DBs, Computer Vision (YOLO, OpenCV).
- Databases:** PostgreSQL, MongoDB, Redis, Supabase, Firebase.
- Cloud & DevOps:** AWS, Docker, CI/CD, Railway, Git, Linux.

Certifications

- AWS Academy Graduate: Cloud Foundations, Operations and Security.
- Cisco: Cybersecurity, IoT and Network Support.
- Kaggle: Computer Vision Models.
