

Daniel Peregrino Perez

📍 Tuxtla Gutierrez, Chiapas, Mexico ✉ danielperegrinoperez@gmail.com ☎ 966 122 9859 🔗 daniel-p-perez
🐙 DanielPPerez

Professional Summary

Full Stack Engineer with end-to-end experience in the digital product lifecycle. Specialist in building robust backends using **Python and Nest.js**, integrating them with dynamic frontends through **Atomic Architecture**. Expert in ensuring software quality via **automated testing** and advanced AI model training.

Experience

Full Stack Specialist & Code Auditor (Python/JS), Outlier AI – Remote Feb 2025 – Jan 2026

- Technical auditing of Full Stack solutions, optimizing algorithmic logic and ensuring security standards for AI-generated code.
- Design of **Adversarial Prompts** and complex scenarios to identify reasoning boundaries and logical hallucinations in LLMs.
- Creation of **Golden Trajectories** and binary evaluation rubrics to improve tool selection precision and query execution for AI agents.

Full Stack Engineer, Digital Solutions Development (End-to-End Projects) – Mexico Jan 2025 – Dec 2025

- Development of CRUD systems and APIs deployed on **Railway**, managing everything from requirement design and database architecture to final deployment.
- Integration of external APIs and frontend service consumption, designing interfaces in **Figma** and components following **Atomic Architecture**.
- Implementation of quality strategies through manual and automated testing using **Unittest and Pytest**, achieving high code coverage.

Software & AI Developer, Computer Vision Project (Professional Internship) – Tuxtla Gutiérrez, Mexico Jan 2026 – Apr 2026

- Developed an image processing system for Edge Computing using **YOLO and OpenCV** for handwritten character detection.
- Created a noisy image normalization pipeline and a scoring engine based on **Distance Transform** for educational assessment.

Education

Universidad Politécnica de Chiapas, Software Engineering

Aug 2022 – Dec 2025

Skills

Full Stack Development: Python (FastAPI/Django), JS/TS (Nest.js/React), PostgreSQL, MySQL, REST APIs, WebSockets, Atomic Architecture, Figma

QA & DevOps: Automated Testing (Pytest, Unittest), Manual Testing, Docker, Railway Deployment, CI/CD, AWS (Certified), Linux

AI & Analysis: Adversarial Prompt Engineering, Computer Vision (YOLO/OpenCV), Exploratory Data Analysis (EDA), Model Context Protocol (MCP)

Languages & Others: English (Technical - Intermediate), GitFlow, Requirement Engineering, Agile Methodologies

Certifications

- AWS Academy Graduate: Cloud Foundations / Operations / Security
- Cisco: Cybersecurity, IoT, and Network Support
